BIO

Full-Stack Software Engineer with 3+ years of experience building and shipping production applications end-to-end, from requirements to deployment, in international teams. Solid expertise in TypeScript, Java, and React within modern full-stack stacks, and a proven Agile partner collaborating closely with Engineering, QA, and Product teams, committed to continuous learning and improvement.

EXPERIENCE

Software Engineer

Code of Africa

July 2024 - Present

Kigali, Rwanda - Hybrid

- Partnered with product owners, QA, and distributed teams to refine requirements, support testing, and ensure high-quality releases across energy and automotive platforms.
- Delivered end-to-end features using Java and React on a regulatory platform for Austria's electricity and gas market, enabling comparison of energy offers.
- Delivered end-to-end features using Java and Dojo on an automotive project, enabling vehicle part configuration, model customization, and localized assembly workflows across international markets.
- Contributed to migrating a legacy Dojo frontend to ReactTs, improving maintainability, performance, and UI.

Full-Stack Engineer

Consumatech

Jan 2024 - Oct 2024

Pretoria, South Africa - Remote

- Developed and maintained full-stack features for a platform enabling South African students to launch small online businesses, using Next.js and NestJS.
- Built and maintained multiple white-label templates, ensuring consistency across 9 business flows and improving scalability through reusable components.
- Worked closely with QA and product teams to validate features, track bugs, and ensure consistent behavior across all website templates.
- Introduced Jest unit tests across templates, improving reliability and reducing regressions.

Front-End Engineer

Sinc

Mar 2023 - Oct 2024

Kigali, Rwanda - Remote

- Developed key frontend features for an event management platform, including the organizer dashboard and event discovery website, using Next.js, TypeScript, and TailwindCSS.
- Partnered with the backend team to define API interactions and ensure efficient data flow, while delivering responsive and user-friendly interfaces.
- Contributed to improving UX through research and implementation, ensuring consistent and high-quality frontend experiences.

Full-Stack Apprentice

Andela

Nov 2022 - Sept 2023

Kigali, Rwanda - Remote

- Built full-stack applications using React, Express, and PostgreSQL as part of structured training and team projects.
- Developed an e-commerce platform in a team environment, participating in code reviews, rotating leadership roles, and implementing basic testing practices.
- Presented weekly demos and participated in Agile ceremonies, strengthening collaboration and communication skills.

SKILLS

Core Stack

Technology	Experience
TypeScript/JavaScript	3+ yrs
ReactJs	3+ yrs
Java	2+ yrs
REST APIs	3+ yrs
