OBJECTIVE

Full-Stack Software Engineer with 3+ years of experience building and delivering production-ready solutions across international teams. Passionate about solving real-world problems through technology.

EXPERIENCE

Software Engineer
Code of Africa

July 2024 - Present
Kigali, Rwanda - Hybrid

- Contributed to a regulatory platform for Austria’s electricity and gas market, enabling comparison of energy offers.
- Contributed to an automotive project, developing software that enables vehicle part configuration, model customization, and localized assembly workflows across international markets
- Developed and maintained scalable applications using Java and React, improving system performance and user experience.
- Migrated a legacy client application from Dojo to React TypeScript, significantly enhancing performance and maintainability.

Full-Stack Engineer
Consumatech

Jan 2024 - Oct 2024
Pretoria, South Africa - Remote

- Fixed backend issues and optimized frontend performance, improving overall user experience.
- Written unit tests to ensure seamless and reliable functionality of the frontend, enhancing overall application stability.
- Standardized code across multiple website templates, enhancing maintainability.

Front-End Engineer
Sinc

Mar 2023 - Oct 2024
Kigali, Rwanda - Remote

- Collaborated with a team of professionals to develop modern day software that largely improved my overall technical skills.
- Collaborated on developing a user-friendly event organizer dashboard for effective event management.
- Collaborated on developing an event explore website enabling users to discover events and make reservations

Full-Stack Apprentice
Andela

Nov 2022 - Sept 2023
Kigali, Rwanda - Remote

- Developed full-stack applications using React, Express, and PostgreSQL.
- Wrote unit and integration tests to ensure code reliability.
- Participated in weekly technical presentations and collaborated in team-based projects.
