

Fabrice Mukunzi

Passionate Full stack developer with 3 years of experience in designing and implementing robust, scalable web applications.

Work Experience

Full-stack Developer [@Consumatech](#)

March 2024 — Present // Pretoria, South Africa - Remote

- Written unit tests to ensure seamless and reliable functionality of the frontend, enhancing overall application stability.
- Ensured uniform code standards across various website templates, enhancing maintainability.
- Resolved backend issues and bugs, significantly enhancing user experience by improving system reliability and performance
- Optimized frontend performance for superior user interaction.

Skills: Typescript, NextJs, TailwindCSS, NestJs, Jest

Front-end Engineer [@sinc](#)

March 2023 — Present // Kigali, Rwanda - Remote

- Collaborated with a team of professionals to develop modern day software that largely improved my overall technical skills.
- Collaborated on developing a user-friendly organizer dashboard for effective event management.
- Collaborated on developing an event explore page enabling users to discover events and make reservations.

Skills: Typescript, NextJs, Redux Toolkit, TailwindCSS, Framer Motion, Ant Design, NextUI

Full stack Apprentice [@Andela](#)

Nov 2022 — Sept 2023 // Kigali, Rwanda - Remote

- Written unit and integration tests for both Frontend and Backend
- Developed my first full-stack personal portfolio as a web developer.

- Participated in weekly team project presentations to technical managers.
- Made research on world-class technologies used in web development.

Skills: Javascript, ReactJs, Redux, TailwindCSS, ExpressJs, MongoDB, PostgreSQL, Jest, Webpack
